

Mobility Options Action Team
Meeting Notes
January 18, 2005

- Attendance** Bud Beebe, Greg Dahlin, Diane Kempen, Rick Lyles, Erin Shelton, Kevin Wisselink
- Meeting Overview**
(25 words or less) Members reviewed the 2004 Transportation Summit and the feedback we received from table discussions. We decided to research survey data currently available and surveys underway to see how our work can build off of them.
- Meeting Notes**
1. Kevin distributed feedback results for the entire summit and the results of the table discussion from the Mobility Options breakout session.
 2. Members discussed the Summit and the feedback we received – we agreed that there were no unexpected results. The main point, that the survey could be too long / complex, will have to be considered when administering it.
 3. Rather than start the survey from the beginning, team members decided the next best step was to see what survey results were already out there, and incorporate those results into our work.

- Action Items**
1. People at the meeting agreed to look at their local areas for survey data we can incorporate into our work – this includes the United We Ride effort, which has a grant from the Federal Government to survey coordination efforts at the local level.
 2. Members who were not present are also asked to research their local communities for surveys that have been completed that could relate to our Perceptions and Gaps work, and to research what survey efforts are currently underway that could be related.

- Proposed Agenda Topics For Next Meeting**
1. Welcome new members to Mobility Options Team
 2. Review survey information members bring to the meeting.
 3. Determine future of Mobility Options Action Team.

Next Meeting Dates Tuesday, February 15, 2005
1:00-4:00 pm
CATA Board Room, 4615 Tranter Avenue, Lansing MI 48910
